

Data-Driven Growth: Strategic Performance & Returns Analysis

Data Analyst Intern Assignment — Presentation of Findings

Prepared by: Senitha Gunathilaka | Date: 7th July 2026

Executive Sales Summary

❖ Key Findings & Insights:

- ▶ **Revenue Peak:** Total Net Sales reached 2.41M LKR across the analyzed period, driven heavily by an aggressive mid-week volume spike on Day 4 (reaching a peak of 483K LKR).
- ▶ **Core Portfolio Drivers:** The portfolio is heavily anchored by **SEDA (41.51%)** and **BABY CLAN (30.07%)**, which together command over 71% of total brand revenue.
- ▶ **Premium Category Anchors:** Sleepwear - Ladies is the clear flagship category, generating the highest singular revenue runway.

❖ Actionable Recommendation:

- ▶ **Velocity Matching.** Schedule marketing push campaigns and inventory restocks specifically to clear fulfillment bottlenecks ahead of the mid-week (Day 4) buying surge.

Product & Brand Optimization

❖ Key Findings & Insights:

- ▶ **Size Profile Velocity:** OS (One Size) and M (Medium) possess the highest inventory velocity. Conversely, extended sizes like XL show steep funnel drop-offs.
- ▶ **Granular Performance:** While SEDA rules gross revenue, the expanded matrix reveals that specific subsets within BABY CLAN (like Baby Clothing) maintain exceptionally high-volume efficiency (330 units sold).

❖ Actionable Recommendation:

Rationalize the Tail. Reduce manufacturing and storage allocations for low-velocity sizes (XL, 9-12M) by 15-20% and reallocate that capital to over-index on high-turnover categories (OS, M).

Operational Control & Returns Analysis

MACKLY — Channel Performance & Returns Analysis

Sales Revenue vs. Unit Volume by Location

Brand Revenue Distribution by Location

Total Refunds Issued

High-Risk Return Log Ledger

Month	Day	LOCATION	ItemName	StyleNo	SIZE	Refund Amount
July	3	THIMBIRIGAYSAYA	BLUMOSAIC L S/SPANT SET	Y26-3-LP3	XXL	-4,990.00
July	3	THIMBIRIGAYSAYA	DPINK COT L FOSHRTSET	Y26-1-LP9	XXL	-4,500.00
July	5	OGF	BUTTERFLY KG LS PSET	Y26-1-GP1	12-14Y	-4,490.00
July	7	THIMBIRIGAYSAYA	SHARK BC U SL PANTSET	Y25-3-BCL0-003	6-9M	-1,400.00
Total						-15,380.00

❖ Key Findings & Insights:

- ▶ **Channel Asymmetry:** *Thimbirigaysaya* is the powerhouse channel, driving 1.11M LKR in sales. However, it is also the highest-risk operational vector.
- ▶ **The Refund Leak:** A total of 15.38K LKR was leaked in refunds/returns.
- ▶ **High-Risk Vulnerability:** The return log indicates a major concentration of returns specifically within *Thimbirigaysaya* for specialized ladies' items and sets (e.g., BLUMOSAIC L S/SPANT SET and DPINK COT L FOSHRTSET) specifically in size XXL.

❖ Actionable Recommendation:

Targeted Quality & Fit Audit. Initiate an immediate fit-and-specification audit for all XXL garments routed to the physical Thimbirigaysaya store. The high refund rate suggests either a manufacturing measurement mismatch or localized visual merchandising issues where customers are buying the wrong size.

The Way Forward & Strategic Action Plan

❖ Immediate Initiatives (Next 30 Days):

- ▶ Implement **Size-Fit Guides** on digital/online channels to curb the return rate before items ship.
- ▶ Establish a localized inventory transfer system to move excess Baby Clan stock to physical retail points where volume demand is proven.

❖ Future Value-Add Dashboards (Next Phase):

- ▶ **Customer Lifetime Value (CLV) Tracker:** A predictive model designed to segment high-value repeat buyers from single-transaction switchers, optimizing marketing spend.
- ▶ **Predictive Stockout Predictor:** An automated inventory alert system utilizing historical sales velocity to notify the warehouse 7 days before top-performing inventory styles—such as **Y26-MOD-CAP-LP3**—run completely out of stock.
